Rolyn Announces Response Capabilities for Flu Season

Rockville, MD, September 1, 2009: Rolyn Companies recently announced its preparations to address any needs related to disinfecting facilities during an outbreak, quarantine situation, or building closure. Hospitals, nursing homes, universities, school systems, child daycare centers, and others are especially alert to dealing with flu outbreaks given the high level of attention the H1N1 threat is getting from government agencies such as the CDC and HHS. In addition to Rolyn's standard capabilities for healthcare infection control and disaster recovery, Rolyn is also prepared to specifically address H1N1 needs with:

- Large quantities of N95 masks in our warehouses
- Enough antimicrobial chemicals for disinfecting millions of square feet
- HEPA and carbon activated air scrubbing equipment
- Ozone equipment for indoor air disinfection in unoccupied spaces
- SteraMist™ hydrogen peroxide mist equipment for disinfecting surgical suites, patient rooms, and other small spaces in occupied buildings
- Trained technicians who can build negative air containment and follow ICRA protocols

Sam Bergman, CEO Rolyn Companies commented, "Rolyn technicians are trained to use the SteraMist portable technology and available on call for any emergency disinfection needs."

About Rolyn Companies

Rolyn Companies is an award-winning, privately-held, full-service disaster recovery, restoration, and specialty construction firm headquartered in Rockville, MD. Rolyn has successfully completed nationwide disaster response, remediation, demolition, restoration and reconstruction projects for commercial, hospitality, industrial, government, educational, multifamily, and health care facilities throughout the country for over 30 years. Rolyn is recognized for our ability to quickly mobilize our trained work force and deploy equipment and materials, anywhere in the continental United States.
